

Ways to work "funner" with your Mac:

Preamble: Using universal access to increase the size (of everything)...

Get a mouse with two buttons and a scroll wheel.

- Demo.
- Learn to use right-click (control-click):
 - Brings up context menu
 - Customized to what application and where you are.
- Try right-click in various places with different apps:
 - Finder: file (open with, trash, get info, duplicate, make alias, copy, services)
 - Text (for many apps): off word, over word (dictionary), over misspelled word
 - Dock
 - Email: message, mailbox, toolbar item
 - Safari:
 - Page: background, link, image, linked image
 - <http://www.mac-scum.org/>
 - Tabs
 - Bookmark bar
 - Toolbar (again)
 - iCal, iTunes, ...
